

Technical Designer

Brabrand, Denmark

Do you thrive on structure, accuracy, and well-organized data—and are you motivated by helping others make their day run smoothly?

About the role

As a Technical Designer at DAFA, you will play a key role in ensuring that our technical documentation, bills of materials (BOM), and data are always up-to-date, accurate, and accessible across the organization. You'll be the go-to person when details matter, and you'll enjoy creating clarity and consistency in our processes.

Your primary responsibilities

- Maintain and update 3D models, technical drawings, and production documentation
- Create and manage bills of materials (BOM) and item data in the ERP system
- Ensure all designs and data comply with internal standards and quality requirements
- Coordinate changes and update documentation in collaboration with Quality and Production teams
- Prepare technical illustrations, datasheets, and assembly guides for internal and external use
- Contribute to standardization and variant management across product families

The ideal candidate

We're looking for someone who loves creating structure and order—and who takes pride in ensuring data and documentation are correct and accessible. You have experience as a Technical Designer, Technical Assistant, or Production Technologist, and you've worked with 3D CAD (preferably SolidWorks), ERP systems (e.g., AX), BOMs, and document management.

You are known for being:

- Organized, detail-oriented, and quality-conscious
- Helpful and collaborative—you enjoy supporting colleagues and sharing knowledge
- Responsible and proactive in managing tasks and deadlines
- Able to maintain an overview, even when handling many details
- Flexible and constructive in your approach to tasks and teamwork
- Experience with documentation, quality assurance, and training colleagues is an advantage.

What we offer

At DAFA, you'll join a dynamic culture driven by ambition, collaboration, and curiosity. You'll have the opportunity to influence the development of our design and documentation processes through your sense of structure and quality. We value people who enjoy creating order, ensuring accurate data, and building systems that make everyday work easier for others. You'll work closely with an experienced R&D team that values knowledge sharing, initiative, and a proactive mindset. At DAFA, precision and teamwork are key to success—and your contribution will be visible and appreciated.

Who we are

Making small invisible changes with a big impact...

At DAFA, we seal, we absorb, and we protect.

With a passion for foam and rubber, we are specialized in making small invisible changes with a big impact. We seal cold air from hot air – and absorb sound to create silence. We dampen vibrations, and we protect objects against shocks and damage. And while our products may seem unnoticeable, they are always irreplaceable.

It all started in 1939 in Denmark.

What began as an entrepreneurial family business producing sealing strips of bronze has today expanded into an international operation – manufacturing the unimaginable across three continents. We cut, we print, and we innovate new solutions. From small nose pads for face masks to protecting large wind turbine blades during transportation, we combine cutting-edge production equipment with great engineering skills and know-how to develop solutions geared to the demands of the future.

But it all begins with our people.

Engineers, operators, or quality controllers. At DAFA, everyone is a master of their craft, united into a culture like a family. Our ambitions are global, but our values are practical and local.

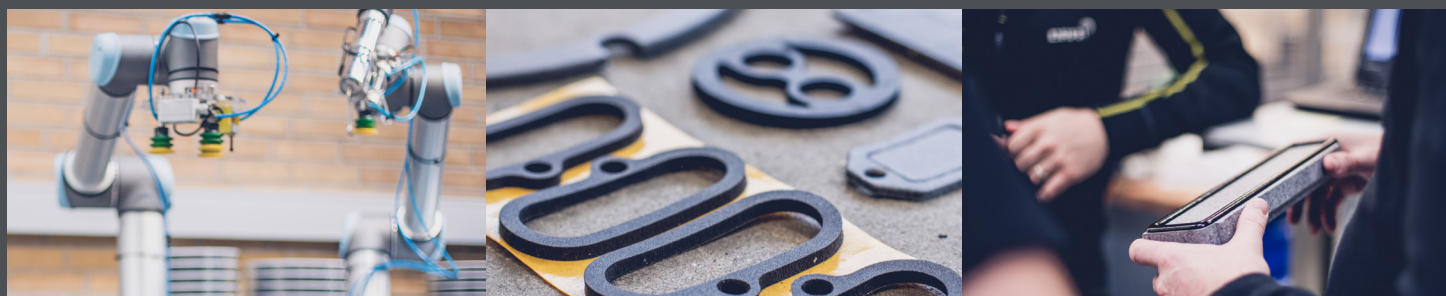

World-class solutions driven by our passion for innovation and sustainability.

Like our products, being visible to the world is not the most important for us. We simply care about being good at what we do and the difference we can make. We go to work every day to earn the trust of each other and our customers – together shaping the future of manufacturing by pushing the industry standards for quality and more sustainability.

We want our 'invisible' products to bring a noticeable impact and make DAFA the best in the world at what we do. Seal, absorb, and protect. One innovative solution at a time.
