

Master Data Specialist

- Driving data quality and operational excellence

Do you want to play a key role in shaping high-quality master data processes in a global growth company?

As Master Data Specialist at DAFA, you will take on a central position responsible for ensuring the highest standards of master data quality across the organization. This newly established role is strategically positioned, and you will refer to the COO.

The role will be crucial in supporting the company's digitalization, process optimization, and ERP transformation initiatives. You will work with colleagues across all functions and geographies, driving consistency, compliance, and efficiency in DAFA's master data landscape

Your key competences include:

- Analyze and assess existing (AS-IS) master data to identify improvement opportunities. Develop a future-state (TO-BE) plan and lead the project management process to drive implementation.
- Plan and facilitate workshops and activities that support the transition to improved master data practices.
- Ensure and maintain high-quality master data across the group, with clear ownership and accountability.
- Drive and coordinate the master data matrix organization to secure consistency and alignment across functions.
- Act as gatekeeper for releasing master data into the ERP system, ensuring accuracy and compliance.
- Develop and facilitate efficient processes, structures, and procedures for master data creation and maintenance at group level.

The ideal candidate

We are seeking a professional with solid experience in master data management, ideally from a production or manufacturing environment. You understand the full value chain and can navigate complex organizational structures while maintaining focus on quality, process, and continuous improvement. A formal education in engineering, finance, or a related field is an advantage, but practical experience in managing master data and driving initiatives across functions is the most important qualification.

You are resilient, self-driven, and proactive, capable of working across multiple organizational levels and influencing stakeholders effectively. You thrive in a collaborative environment, balancing structured, methodical work with a hands-on approach. Your energy, curiosity, and strong relationship-building skills enable you to engage teams and ensure alignment, while your focus on results guarantees that initiatives are successfully implemented and sustained.

Master Data Specialist

We offer

At DAFA, we offer a unique opportunity to take a key role in a global, innovative, and growing company. You will join a collaborative and solution-oriented culture with a strong family spirit, preserved despite international expansion. Working closely with an experienced management team, you will have the organizational support to make a significant impact, with clear responsibilities and visibility at a strategic level. The position provides international exposure, cross-functional collaboration, and excellent opportunities for professional and personal growth.

Who we are

Making small invisible changes with a big impact...

At DAFA, we seal, we absorb, and we protect.

With a passion for foam and rubber, we are specialized in making small invisible changes with a big impact. We seal cold air from hot air – and absorb sound to create silence. We dampen vibrations, and we protect objects against shocks and damage. And while our products may seem unnoticeable, they are always irreplaceable.

It all started in 1939 in Denmark.

What began as an entrepreneurial family business producing sealing strips of bronze has today expanded into an international operation – manufacturing the unimaginable across three continents. We cut, we print, and we innovate new solutions. From small nose pads for face masks to protecting large wind turbine blades during transportation, we combine cutting-edge production equipment with great engineering skills and know-how to develop solutions geared to the demands of the future.

But it all begins with our people.

Engineers, operators, or quality controllers. At DAFA, everyone is a master of their craft, united into a culture like a family. Our ambitions are global, but our values are practical and local.

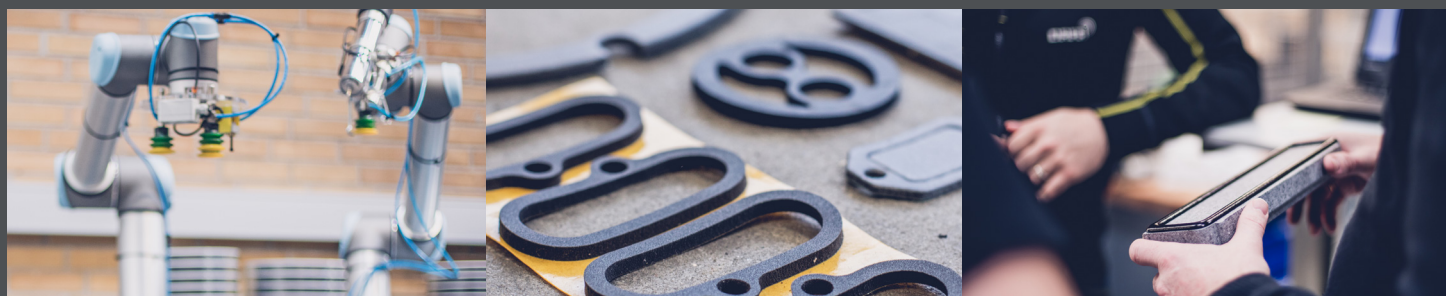

World-class solutions driven by our passion for innovation and sustainability.

Like our products, being visible to the world is not the most important for us. We simply care about being good at what we do and the difference we can make. We go to work every day to earn the trust of each other and our customers – together shaping the future of manufacturing by pushing the industry standards for quality and more sustainability.

We want our 'invisible' products to bring a noticeable impact and make DAFA the best in the world at what we do. Seal, absorb, and protect. One innovative solution at a time.
