

Quality Engineer

Do you want to help ensure high quality, robust processes, and strong customer satisfaction?

DAFA Group is looking for a dedicated Quality Engineer to join our Quality organization in Denmark. In this role, you will play a central part in ensuring that our products and solutions consistently meet both customer expectations and our own high standards.

The Role as Quality Engineer

As a Quality Engineer, you serve as a key integrator across the organization, ensuring seamless collaboration between customers, suppliers, sales, procurement, R&D, PTA, and production to safeguard and enhance product quality. You will work both analytically and hands-on to ensure that our processes, documentation, and quality performance are of the highest standard.

You will report to the Group Chief Quality Officer and collaborate widely across the organization.

Key Responsibilities

- Handle and analyze non-conformities (NCR) using the 8D method and root cause analysis
- Prepare and maintain complete PPAP documentation, including measurement reports, material tests, control plans, and IMDS registration
- Develop and update quality documentation for production (e.g., Go/No-Go catalogues and control instructions)
- Actively contribute to projects and ECM processes, including control of prototype and reporting
- Conduct and support internal and external audits (ISO, customer audits, supplier audits, product/ process audits)
- Manage customer self-assessments / surveys
- Perform quality laboratory tests (climate chamber, tensile and peel tests)
- Contribute to development of Process FMEA in collaboration with PTA/R&D

Your Areas of Responsibility and Decision-Making Authority

- Approve or reject products and materials
- Stop production in case of critical quality deviations
- Request and follow up on corrective actions
- Participate in customer meetings and represent the Quality function cross-functionally
- Sign CoC/CoA and PPAP documentation

What Success Looks Like

- You solve quality issues quickly, thoroughly, and based on data
- You collaborate effectively across functions and communicate clearly
- You work in a structured way and deliver accurate documentation
- You are proactive, curious, and contribute to continuous improvement
- You support DAFA's strategy towards 2028 through strong customer focus and high-quality performance

Quality Engineer

Your Qualifications

- Experience working with quality in an industrial or manufacturing environment
- Solid understanding of PPAP, FMEA, audits, and quality management tools
- Ability to read and interpret technical drawings
- A data-driven mindset and strong analytical skills
- Enjoy both hands-on tasks and customer interaction
- Language skills: Danish and strong English skills are required (DAFA is an international organization with daily communication in English)

Practical Information

- Location: Brabrand, Denmark
- Travel: Some travel may occur
- Start date: As soon as possible

Are you the one we are looking for?

If you are passionate about quality and want to be part of an international company with strong values, high ambitions, and great development opportunities, we look forward to hearing from you.

Who we are

Making small invisible changes with a big impact...

At DAFA, we seal, we absorb, and we protect.

With a passion for foam and rubber, we are specialized in making small invisible changes with a big impact. We seal cold air from hot air - and absorb sound to create silence. We dampen vibrations, and we protect objects against shocks and damage. And while our products may seem unnoticeable, they are always irreplaceable.

It all started in 1939 in Denmark.

What began as an entrepreneurial family business producing sealing strips of bronze has today expanded into an international operation - manufacturing the unimaginable across three continents. We cut, we print, and we innovate new solutions. From small nose pads for face masks to protecting large wind turbine blades during transportation, we combine cutting-edge production equipment with great engineering skills and know-how to develop solutions geared to the demands of the future.

But it all begins with our people.

Engineers, operators, or quality controllers. At DAFA, everyone is a master of their craft, united into a culture like a family. Our ambitions are global, but our values are practical and local.

World-class solutions driven by our passion for innovation and sustainability.

Like our products, being visible to the world is not the most important for us. We simply care about being good at what we do and the difference we can make. We go to work every day to earn the trust of each other and our customers - together shaping the future of manufacturing by pushing the industry standards for quality and more sustainability.

We want our 'invisible' products to bring a noticeable impact and make DAFA the best in the world at what we do. Seal, absorb, and protect. One innovative solution at a time.
