

# DAFA PUR Transport Pad

- PUR 50A/STAINLESS STEEL

Bolted pad for stabilizing towers, blades and heavy items during transportation

Transport frame for heavy duty transport using DAFA Modular Transport Pad.

**Standard dimensions\*:**  
525mm x 134mm x 21.5mm  
525mm x 134mm x 50 mm

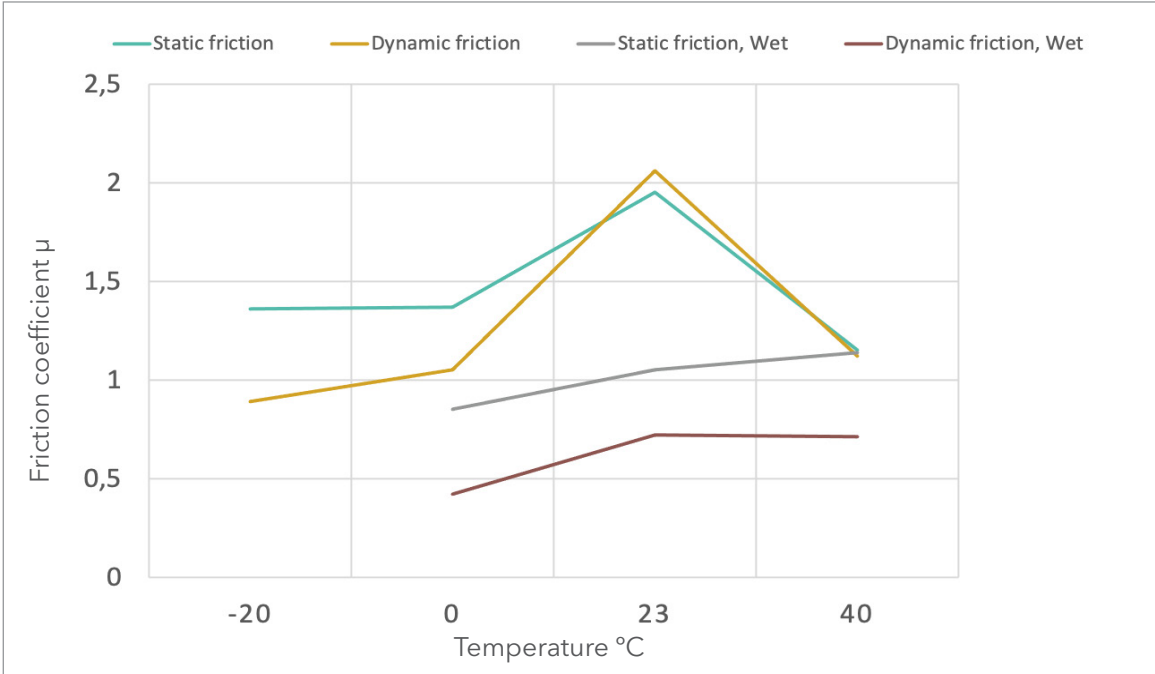

\*Other dimensions upon request

- High load
- Mechanically fastened - No gluing, uses standard M10 DIN 931 bolts
- Easy and fast mechanical installation
- Grey non-marking material
- The diamond-shaped surface helps to guide the water away
- High friction
- Modular universal system
- Solid PUR/stainless steel pad

## DAFA PUR Transport Pad

### Friction data

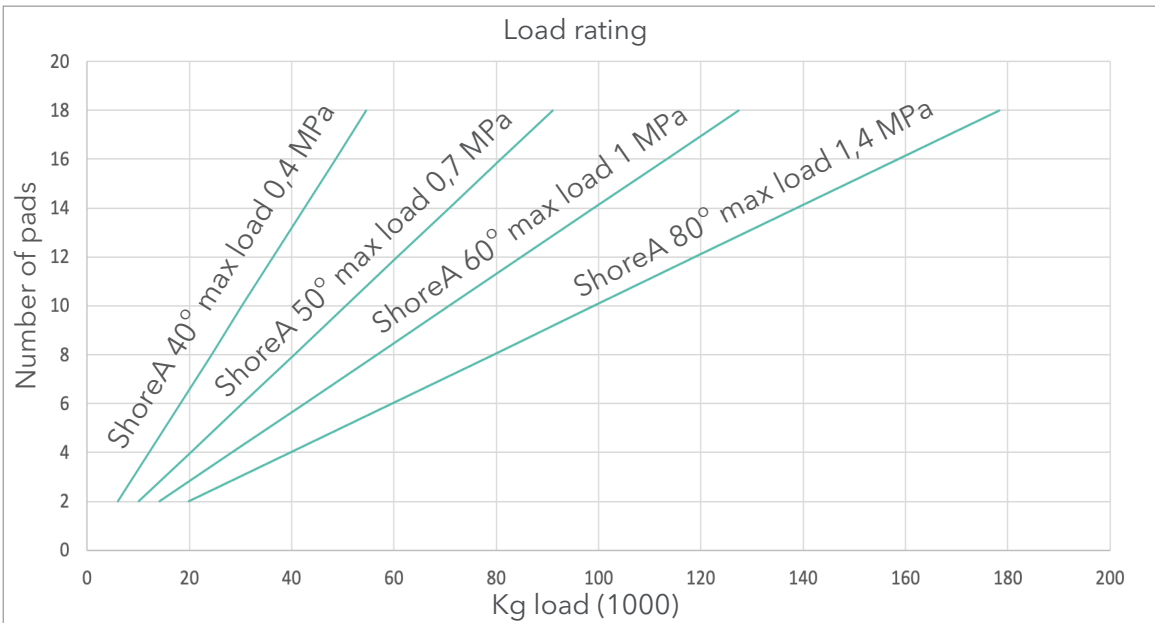

Friction data, SH. A50 - ISO 15113

Tested against wind turbine blade coating.

### Modular universal system

The pad is ideal for heavy loads

Additional engineering data and layout assistance upon request
