

DAFA Face Shield

Self-produced comfortable face shield for protection against drops, splashes and liquids.

A facial shield that effectively protects against drops, splashes and liquids

As the world is still fighting COVID-19, there is still a great demand for protective equipment in . Therefore, within a very short time, DAFA's Innovation Department has developed a protective shield for the face. An innovative solution in foam and plastic foil to suit all head sizes.

The shield can be used in all industries where protection from drops, splashes, and liquids is required.

Our high degree of flexibility within our production methods allows us to adapt to this task quickly. This enables us to start production immediately, so we can supply large quantities on short notice.

Material

Shield: Large, lightweight and durable PET visor.

Headband: PE foam without chemical foaming agent. Moisture absorption is prevented as the PE foam cell structure is 100% closed. The soft and flexible properties of the foam make it comfortable to wear, even for extended periods.

Advantages

- Large visor (W: 320 mm / L: 215 mm)
- Features a closed top to reduce the risk of infection as much as possible
- High technical quality
- Comfortable PE foam
- Designed to sit firmly on head
- Plenty of room for glasses
- Low weight: approx. 28 g
- One size model
- It can be cleaned with water or glass cleaner up to 25 times.
