

# Business Controller

**Do you want to take the lead on business controlling while helping accelerate the digital transformation within finance?**

## **Driving financial decisions and digitalization**

You will be reporting to the CFO, while you share responsibility for driving and developing business controlling across sales, operations, and production. You will act as a key sparring partner, ensuring that strategic and operational decisions are made on a solid data foundation. At the same time, you will help develop and support the other controllers in the finance team without formal leadership responsibility.

You will play a central role in DAFA's ongoing digitalization and automation of the finance area. Through BI solutions, data analysis, and process optimization, you will contribute to creating a more agile, efficient, and data driven decision making foundation. You will have the freedom to challenge existing processes and implement new digital tools that enhance insight and business value.

## **Your primary responsibilities**

- Drive and further develop the company's business controlling function
- Prepare and analyze KPIs, and support and validate forecasts and budgets
- Translate data into clear business insights and recommendations
- Support strategic decision making through financial analyses and scenario modelling
- Act as an active sparring partner for the CFO and business units
- Drive the digitalization and automation of reporting and analytical tools
- Ensure data quality and develop KPIs and reporting
- Participate in cross-functional strategic projects

## **Why join DAFA?**

At DAFA, you will become part of a culture in transformation, where ambition, collaboration, and curiosity drive progress. DAFA is on a digital journey, where data, automation, and insight will strengthen both decision making and business development.

You will have the opportunity to influence how the finance function evolves and contribute to an organization where financial insight plays a central role in business growth. This is an exciting position in an international group, offering great impact, professional challenges, and opportunities for both personal and career development.

# Business Controller

## Business-oriented Controller with a digital mindset

We imagine that you have solid experience as a Business Controller, preferably from a manufacturing company with international operations. You are confident in your expertise and thrive in a role where you inspire and support fellow Business Controllers, without formal leadership responsibilities. You are proactive and have a strong business acumen, combining it with analytical insight to deliver well-founded analyses and decision support. You are used to working data-driven, creating insight, and enjoy an environment with many touchpoints and close collaboration both globally and locally.

## In addition, you have

- A relevant education such as cand.merc.aud., HD-R, or similar
- Experience with digitalization and automation of financial processes supporting a growth strategy
- Strong skills in Excel, Power BI, and ERP systems
- A natural curiosity about new technologies and methods
- Strong communication skills and the ability to present complex data to non-financial stakeholders
- Fluency in Danish and English both written and spoken
- A proactive and solution-oriented mindset

## Who we are

Making small invisible changes with a big impact...

### At DAFA, we seal, we absorb, and we protect.

With a passion for foam and rubber, we are specialized in making small invisible changes with a big impact. We seal cold air from hot air - and absorb sound to create silence. We dampen vibrations, and we protect objects against shocks and damage. And while our products may seem unnoticeable, they are always irreplaceable.

### It all started in 1939 in Denmark.

What began as an entrepreneurial family business producing sealing strips of bronze has today expanded into an international operation - manufacturing the unimaginable across three continents. We cut, we print, and we innovate new solutions. From small nose pads for face masks to protecting large wind turbine blades during transportation, we combine cutting-edge production equipment with great engineering skills and know-how to develop solutions geared to the demands of the future.

### But it all begins with our people.

Engineers, operators, or quality controllers. At DAFA, everyone is a master of their craft, united into a culture like a family. Our ambitions are global, but our values are practical and local.

### World-class solutions driven by our passion for innovation and sustainability.

Like our products, being visible to the world is not the most important for us. We simply care about being good at what we do and the difference we can make. We go to work every day to earn the trust of each other and our customers - together shaping the future of manufacturing by pushing the industry standards for quality and more sustainability.

We want our 'invisible' products to bring a noticeable impact and make DAFA the best in the world at what we do. Seal, absorb, and protect. One innovative solution at a time.
